

# Pourform® Concrete-Forming Panels Warranty

Savona Specialty Plywood, the manufacturer, warrants that Pourform concrete-forming panels are guaranteed against manufacturing defects.

If failure occurs within the reasonable life of the panel, and subject to proper handling and storage procedures having been followed, Savona Specialty Plywood will reimburse the purchase price of the material or, at its option, replace the defective panel(s). This warranty applies to the original purchaser only. Neither manufacturer nor seller shall have liability for any indirect or consequential damage, or for any loss or damage except as expressly stipulated herein whether caused by negligence or otherwise. All other representations, warranties and conditions whether express, implied, contractual or otherwise, including representations, warranties or conditions of fitness for any particular or merchantability are expressly excluded.

Pourform concrete-forming panels must be treated with a chemically active release agent prior to the first, and each subsequent reuse. Do not use other form-release agents that contain diesel fuel, mineral spirits or motor oil as these will soften and eventually degrade both the overlay and the panel itself. Use of agents containing diesel fuel, mineral spirits, or motor oil will reduce and/or void the warranty.
